Product Description

42.72x60.26mm TFT LCD Small Touch Screen with 40-Pin FPC and ILI9341 Driver IC

Product Description:

The color pixel arrangement of this display is RGB vertical stripe, which provides bright and vivid colors. This makes it an excellent choice for displaying images and videos, as well as for use in graphic user interfaces. Additionally, this display has a 12 o'clock viewing angle, which means that it can be easily viewed even in bright sunlight.

This Small LCD Touch Screen also includes a capacitive touch screen, which enables users to interact with the display using their fingertips. This provides a more intuitive and user-friendly interface, making it ideal for use in a wide range of applications.

With a storage temperature range of -30~ +80 , this display is highly durable and can withstand extreme temperatures. This makes it ideal for use in harsh environments, such as outdoor applications or industrial settings.

Overall, our Small LCD Touch Screen is an excellent choice for anyone looking for a high-quality display that is both durable and versatile. Its 2.4 inch TFT LCD, TN display technology, and capacitive touch screen make it ideal for use in a wide range of applications, from portable gaming devices to industrial instruments.
