Product Description

320x480 3.5 Inch TFT LCD Touch Screen With 5ms Response Time And 300 Nits Luminance

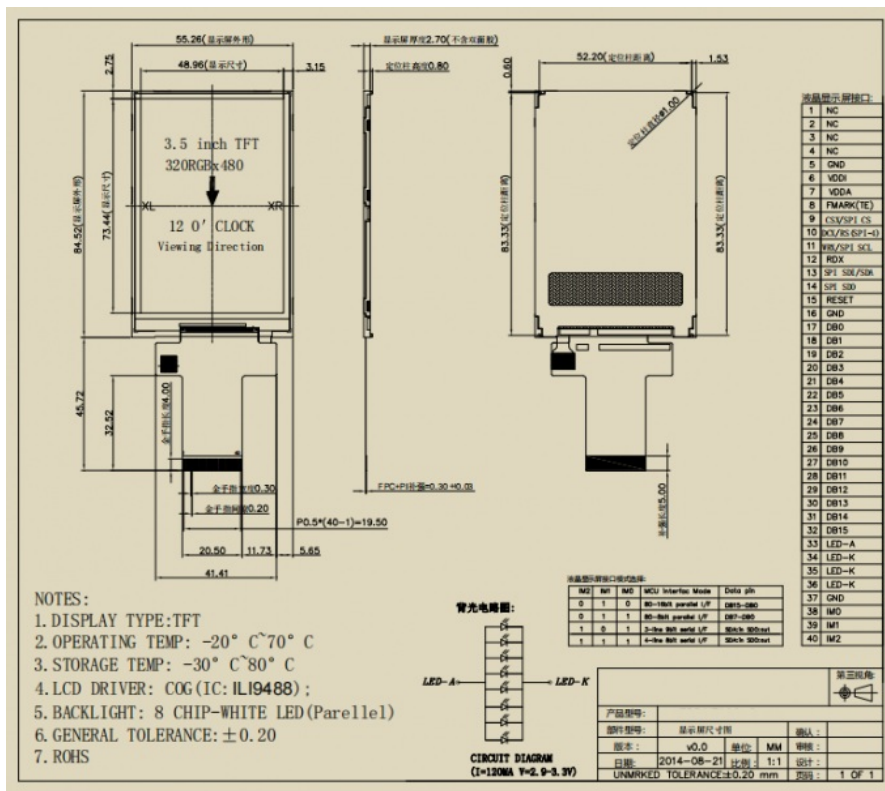

Product Description:

The display IC, ILI9488, ensures that the visuals are of the highest quality with excellent color reproduction and clarity. The 3.5" TFT LCD Touch Screen has a CTP structure of G+F+F, which guarantees high accuracy and responsiveness when using the touch screen feature. The Touch IC GT911, which is incorporated into the design, ensures smooth and precise touch control. This means you can use the touch screen feature with confidence, knowing that the response time will be fast and accurate.

The 3.5" TFT LCD Touch Screen has been designed to operate in a wide range of temperatures, from -20 to +70 degrees Celsius. This makes it suitable for use in a variety of environments, from cold storage facilities to industrial settings.

The 3.5" TFT LCD Touch Screen with Capacitive Touch technology is ideal for a range of applications, including industrial control systems, medical devices, and consumer electronics. Its compact size makes it easy to integrate into existing products, while its advanced features make it a reliable and high-performing choice for any application that requires a touch screen display.
