

2.4 Inch 12 O'Clock Viewing Direction Small TFT LCD Display With 250Cd/m2 Brightness And -30 To 80 Degrees Celsius Temperature Range

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ROHS
- Model Number: ZH024TC22022V.C-1
- Minimum Order Quantity: 1 pieces
- Price: Negotiated
- Packaging Details: Carton Packing
- Delivery Time: 7-15 working days
- Payment Terms: T/T
- Supply Ability: 300k per month

Product Specification

- Drive IC: ST7789V2
- Storage Temperature: -30 To 80 Degrees Celsius
- Interface Type: 4 Line-SPI Interface
- Screen Size: 2.4 Inches
- Operating Temperature: -20 To 70 Degrees Celsius
- Brightness: 250Cd/m2
- Touch Screen: Capacitive Touch Screen
- Resolution: 240x320 Pixels
- Highlight: **2.4 inch Small TFT LCD Display ,
250Cd/m2 Small TFT LCD Display**

Product Description

Product Description:

One of the standout features of this display is its Capacitive Touch Screen, which allows for easy navigation and interaction with the display. This feature makes it ideal for use in devices where touch input is required, such as handheld gaming devices or industrial control panels.

The Tiny TFT LCD Display also boasts an impressive contrast ratio of 500:1, ensuring that images and text are crisp and easy to read.

This makes it a great choice for applications where clarity is important, such as in medical devices or GPS systems.

In addition to its impressive display features, this product also has a wide operating temperature range, with a storage temperature range of -30 to 80 degrees Celsius. This makes it suitable for use in a variety of environments, from industrial settings to outdoor applications.

Overall, the Tiny TFT LCD Display is an excellent choice for anyone looking for a high-quality display that is both compact and versatile.

Whether you are designing a new handheld device or upgrading an existing system, this display is sure to meet your needs and exceed your expectations.

Features:

Product Name: Small TFT LCD Display

Display Type: TFT

Screen Size: 2.4 Inches

Interface Type: 4 Line-SPI Interface

Operating Temperature: -20 To 70 Degrees Celsius

Storage Temperature: -30 To 80 Degrees Celsius

This Little Thin Film Transistor LCD is a miniature thin film transistor display that is perfect for small projects. Its petite TFT monitor makes it ideal for use in compact spaces.

Technical Parameters:

Power Supply	3.3V
Viewing Direction	12 O'Clock
Display Type	TFT
Storage Temperature	-30 To 80 Degrees Celsius
Screen Size	2.4 Inches
Operating Temperature	-20 To 70 Degrees Celsius
Contrast Ratio	500:1
Interface Type	4 Line-SPI Interface
Touch Screen	Capacitive Touch Screen
Drive IC	ST7789V2

Applications:

This display is perfect for a wide range of applications. The 2.4 inch screen size is ideal for use in portable devices such as handheld gaming consoles, digital cameras, and MP3 players. The high contrast ratio of 500:1 ensures that images and text are easy to read, making it suitable for use in devices that require clear and sharp displays.

The Little Thin Film Transistor LCD display is also versatile in terms of interface. It features a 4 Line-SPI interface, making it easy to integrate into a wide range of devices. The LED backlight type ensures that the display is bright and clear, even in low light conditions.

The Little Thin Film Transistor LCD display is available for purchase with a minimum order quantity of just one piece. The price is negotiable, and the display comes packed in a carton for safe transportation. Delivery time is typically 7-15 working days, and payment terms are T/T.

With a supply ability of 300k per month, the Little Thin Film Transistor LCD display is the perfect choice for manufacturers of portable devices that require a small, high-quality display. Order yours today and see the difference that this display can make in your device!
